2D PICKLEBALL GAME

► PRESS START ◀

Balongoy · Chavez · Oracion · Polangco · Costanos

[BACKGROUND & INSPIRATION]

FAST-GROWING SPORT

Pickleball blends tennis,
badminton & ping-pong.
Now going digital!

2 PLAYERS

DIGITAL ADAPTATION

Bringing the sport to any
screen – no court needed.
Play anytime, anywhere!

1v1 REAL-TIME

COMPETITIVE SPIRIT

Reflexes, timing, rivalry.
Capturing real pickleball
intensity in pixels!

2D COURT

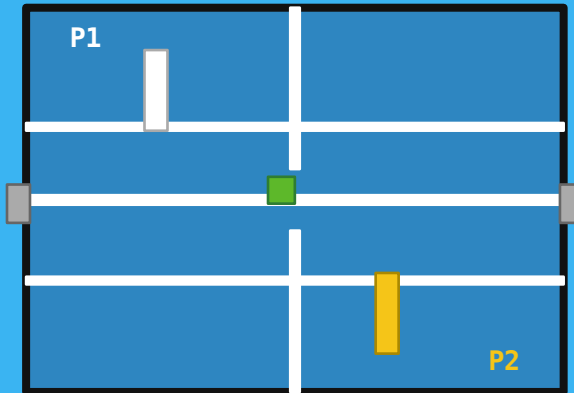

[GAMEPLAY OVERVIEW]

GOAL

Outscore opponent by returning ball & forcing errors. Reach target score to win!

PLAYERS

2 players, each controls a paddle on opposite sides of the 2D court.

CONTROLS

Keyboard moves paddle vertically. Timing & position control ball direction.

SMASH

Optional power mechanic! Activated under special in-game conditions.

1. Rally starts

2. Miss → opponent scores

3. Speed increases!

4. First to target wins!

[CLASSES & DATA STRUCTURES]

class Player

```
{  
  position: (x, y)  
  speed: float  
  score: int  
}  
  
// Manages each player state
```

class Paddle

```
{  
  size: (w, h)  
  position: (x, y)  
}  
  
// Stores paddle dimensions &  
// location
```

class Ball

```
{  
  position: (x, y)  
  speed: float  
  direction: vec2  
  collision: bool  
}  
  
// Tracks movement & collisions
```

```
// Extra vars:  ballSpeed · ballDirection · gameState { START | PLAYING | GAMEOVER }
```

[GAME LOGIC & ASSETS]

⚙️ GAME IMPLEMENTATION

► Collision Detection

Ball-paddle & ball-boundary checks;
controls bounce & scoring.

► Scoring System

Point when opponent misses
or hits out of bounds.

► Progressive Difficulty

Ball speed ramps up for
more intense rallies!

► Game State Manager

Handles START → PLAYING
→ GAMEOVER transitions.

► Smash Mechanic

Power hit on special
condition trigger.

ASSETS

GRAPHICS
